

◆ **RAF Series Furnace**

Proven reliability in demanding high temperature applications

Despatch RAF furnaces feature horizontal recirculating airflow with adjustable louvers to ensure exceptional temperature uniformity throughout the furnace. These high-performance furnaces deliver temperatures up to 538°C (1000°F) and are great for such processes as annealing, aging, stress relieving and other process critical applications.

The RAF is available in cabinet and benchtop models. The cabinet furnace is suited for volume production while the benchtop model, with its small footprint, is ideal for high temperature process development in a laboratory.

This furnace is equipped with the Protocol 3™ microprocessor-based temperature and hi-limit controller with large LCD display and real time clock for auto start capability. The LCD display shows temperature readings along with clear, detailed information on oven status. The data-logging functionality enables reporting and analyzing and data files can be exported via the controller's USB port. Modbus RS485 communications are included for easy data access.

FEATURES AT A GLANCE

- ◆ Temperatures up to 538°C (1000°F)
- ◆ 3 models - 4.2, 19 & 35 cu. ft. (117, 552 & 991 liters) capacity
- ◆ Horizontal recirculating airflow
- ◆ Despatch unique adjustable louvers on RAF2-19 and RAF 2-35 models
- ◆ Protocol 3™ control with large LCD display, integrated data logging capabilities and USB port for simple oven set-up and data export
- ◆ RS485 Modbus communication PC interface
- ◆ Audible and visual high-limit alarm
- ◆ 304 stainless steel interior
- ◆ Disconnect switch on main control panel
- ◆ 5 year heater warranty
- ◆ End-of-cycle and high-limit indicators
- ◆ UL/C-UL listed open industrial control panel

OPTIONS

- ◆ Chart recorder
- ◆ Access ports for test wires
- ◆ CE compliant

Notes: Uniformity figures are based on a nine-point test conducted in an empty oven after stabilization period. Uniformity can vary slightly depending on unit and operating conditions. Minimum operating temperature and cooling times are based on 20°C ambient temperature measured at the fresh air inlet with the fresh air and exhaust dampers fully open. Specifications are subject to change without notice. If the existing specifications differ from yours, ask about our customizing capabilities.

RAF models are not to be used with flammable solvents, materials or containers.
If your process involves flammable solvents please inquire about our RFF models.

Δ represents the change in ambient temperature
