

◆ Large Truck-In/Walk-in Ovens

TAD3-48/TAD3-96 and TFD3-48/TFD3-96

Class A models for flammable solvents

Despatch 476 and 952 cubic foot TAD/TFD walk-in ovens feature uniflow airflow to ensure uniform temperatures throughout the oven. High volume fans deliver heated air through adjustable louvers from both sides of the chamber. This air moves horizontally and vertically through the work chamber to be reheated and recirculated through the system. The result is proven reliability in demanding production applications, such as aging, bonding, curing, drying, finish baking and heat treating.

Despatch TFD Class A ovens are specifically designed to meet NFPA 86 requirements for applications that include flammable solvents or large amounts of moisture removal. These oven comes complete with a pressure relief panel, purge timer, and exhaust fan.

These ovens are equipped with a Watlow F4T temperature controller and high limit controller with 4.3" color graphical touch screen interface and Ethernet Modbus. The controller can be programmed with up to 40 ramp/soak profiles. Data-logging functionality enables reporting and analyzing and data files can be exported via the controller's USB port.

OPTIONS

- ◆ Plate floor or insulated floor with truck tracks
- ◆ Loading trucks and shelves
- ◆ Proportioning gas fired heater
- ◆ Pneumatic vertical lift doors
- ◆ Rear doors
- ◆ Chart recorder

FEATURES AT A GLANCE

- ◆ Temperatures up to 343°C (650°F)
- ◆ Factory tested and shipped in unitized sections for easy installation
- ◆ Despatch unique adjustable louvers
- ◆ Watlow F4T controller
- ◆ Audible high-limit alarm
- ◆ Two-inch test access port
- ◆ Aluminized steel interior
- ◆ High volume recirculating fans provide faster, more uniform heating
- ◆ Disconnect switch
- ◆ UL and C-UL listed open industrial control panel

Notes: Uniformity figures are based on a nine-point test conducted in an empty oven after stabilization period. Uniformity can vary slightly depending on unit and operating conditions. Minimum operating temperature and cooling times are based on 20°C ambient temperature measured at the fresh air inlet with the fresh air and exhaust dampers fully open. Specifications are subject to change without notice. If the existing specifications differ from yours, ask about our customizing capabilities.
