TFD Class A Walk-In Ovens and Truck-In Ovens

For applications involving flammable solvents or excessive solvent removal

Despatch TFD Class A ovens are specifically designed to meet NFPA 86 requirements for applications that include flammable solvents or large amounts of moisture removal. The oven comes complete with a pressure relief panel, purge timer, and exhaust fan.

TFD Truck-in/Walk-in ovens feature horizontal recirculating airflow to ensure uniform temperatures throughout the oven. A high-volume fan circulates air through perforated, aluminized steel walls to create a constant horizontal airflow across all sections of the oven. The result is proven reliability in demanding production applications, such as aging, bonding, curing, drying, finish baking and heat treating. The included Protocol 3™ controller provides a level of temperature control, versatility, and operational simplicity unmatched in the industry.

OPTIONS

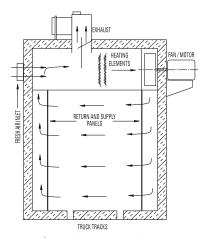

- Insulated floor with truck tracks
- Despatch unique adjustable louvers
- Loading trucks and shelves
- Proportioning gas fired heater
- Chart recorder
- Rear doors
- CE compliant

FEATURES AT A GLANCE

- ◆ Temperatures up to 343°C (650°F)
- Class A package meeting NFPA 86 requirements for flammable solvents
- Fully assembled and factory tested
- ◆ Protocol 3[™] control with large LCD display, integrated data logging capabilities and USB port for simple oven set-up and data export
- Audible high-limit alarm
- Two-inch test access port
- ◆ Aluminized steel interior
- Disconnect switch
- High volume recirculating fan provides faster, more uniform heating - saving process time and improving product quality
- ◆ Plate floor with truck tracks
- UL and C-UL listed open industrial control panel

| Recirculating fan | 2 HP / 1700 CFM (802 l/s) | 5 HP / 3800 CFM (1793 l/s) | 10 HP / 6000 CFM (2832 l/s) |
| Control stability | +/- 0.5°C on all models | | |

TFD front view cross section showing airflow pattern.

Notes: Uniformity figures are based on a nine-point test conducted in an empty oven after stabilization period. Uniformity can vary slightly depending on unit and operating conditions. Minimum operating temperature and cooling times are based on 20°C ambient temperature measured at the fresh air inlet with the fresh air and exhaust dampers fully open. Specifications are subject to change without notice. If the existing specifications differ from yours, ask about our customizing capabilities.
